

Esteban Eduardo Nava Velázquez

Tampico, Tamaulipas, México • +52 833 105 09 22 • a180313@une.edu.mx

Computer and Electronic Systems Engineer with a strong background in software development and experience in creating websites and web applications. I work with technologies such as Node.js, Express.js, React, and Angular, and I specialize in building modern, functional, and responsive interfaces. I am passionate about web development, continuous improvement of systems, and the implementation of innovative technological solutions. I am looking to join a team where I can contribute my skills and continue growing as a developer.

WORK EXPERIENCE

GBCI GROUP

Web development and testing intern

Tampico, México

December 2023 – October 2024

- Hands-on experience in web application development during my professional internships. I have implemented functional projects using technologies such as React, Python, and SQL, demonstrating strong skills as a full-stack developer.
- Project development following the Agile methodology, applying Scrum practices and collaborative management with Git/GitHub.
- Responsible for testing functionalities developed by the team, ensuring quality and proper performance. I also provided technical support to new members to help them integrate into the project.
- Implemented visual interfaces using component libraries (Ant Design, Bootstrap) to deliver a modern and responsive user experience.
- Optimized database queries to improve application performance and efficiency.

Pro Internet

Backend developer

Tampico, México

Nov 2024 – Oct 2025

- Development of robust web applications using Node.js, Express, and SQL, integrating dynamic interfaces with Handlebars (HBS) and styling with CSS.
- Implementation of optimized RESTful APIs, improving performance through adjustments in SQL queries and system architecture.
- Creation of scalable solutions with clean, secure, and well-structured code, effectively integrating frontend and backend.
- Active participation in the migration of legacy systems (ASP Classic and traditional ASP) to modern architectures based on Node.js and Express.js.

EDUCATION

UNIVERSIDAD DEL NORESTE

Computer and Electronics Engineering

Tampico, México

July 2025
